

***Rightside* Concert Rider:**

Equipment:

Rightside supplies our own complete sound system. We just need to know the seating size of the venue and approximate size of the facility to bring the proper speaker array.

Stage

The stage should be cleared of all items so ***Rightside*** can setup their complete band. There are drums, bass, piano, keyboard and vocals for a total of 5 on stage. Stage should have a set of steps to access from the front.

If the event is an outside event there shall be a stage or flat level concrete or paved surface to setup on. **Under no circumstances will we setup equipment on dirt or grass areas** due to dust getting into sensitive electronic equipment. There shall be at least 2 separate 120 volt 20 amp power sources available within 50'. No small generators. If a generator is needed it shall be a minimum 10KWV Quiet Power Generator with a minimum 50A 240V output.

Sound Check

Rightside will arrive approximately 2 hours before concert time to setup their equipment and perform a sound check. The sound check will occur approximately one hour prior to the concert. If special lighting is used, the lighting operator should be present at the sound check as well. All doors to the event area shall be closed and no one will be allowed in during sound check.

Prayer

All those involved in hosting the concert should meet in a central area to pray over the event at least 30 minutes before concert time.

Room

A room should be prepared for the group that allows them to relax, change clothes if necessary, pray, and get prepared mentally for the concert. It should have easy access to a bathroom and the stage.

Table

Rightside will require the use of an 8ft table placed in a high traffic area to display CD pre-order information and CDs as they come available.

Finances

Unless prior arrangements have been made it is our agreement that a Love Offering shall be taken for ***Rightside*** and their CD's and products shall be available for sale before, during and after the concert.
